

PICCs in Patients with eGFR (estimated glomerular filtration rate) < 45 (without Nephrology approval)

PICCs with eGFR <45 (without nephrology approval)

Goal

- Decrease the number of PICCs placed in patients with an eGFR <45 (without nephrology approval)

Interventions Implemented

- Obtained **Nephrology buy in** for approval of PICCs in patients with an eGFR <45
- **Educated** nursing staff to obtain nephrology consult before placing PICCs in patients with an eGFR <45
- Vascular access identifies patients with low eGFR and consults with Nephrology prior to PICC placement
