

# PICCs (Peripherally-Inserted Central Catheters) in for $\leq 5$ Days (excluding deaths)

*PICCs  $\leq 5$  Days*

## Goal

- Reduce the number PICCs in for  $\leq 5$  days

## Interventions Implemented

- **Educated** ordering physicians regarding the importance of ordering the best device for the individual patient
- Physician champion reviews cases and **educates** providers
- **Added extended dwell catheters** as an option in physician order sets
- Ability for nursing to call RRT for assistance in difficult access
