

Antibiotic Stewardship Reduces Inpatient Fluoroquinolone Use But...Increases New Fluoroquinolone Use at Discharge

6,820 Patients with Pneumonia
4,928 with Positive Urine Culture

14 Hospitals Targeted Fluoroquinolones
34 Did Not

11%
fewer patients received a
fluoroquinolone in
hospitals targeting
fluoroquinolone use

Double
the number of patients
were newly started on a
fluoroquinolone at
discharge
