

Variation in scheduling and receipt of primary care follow-up after hospitalization for COVID-19 in Michigan

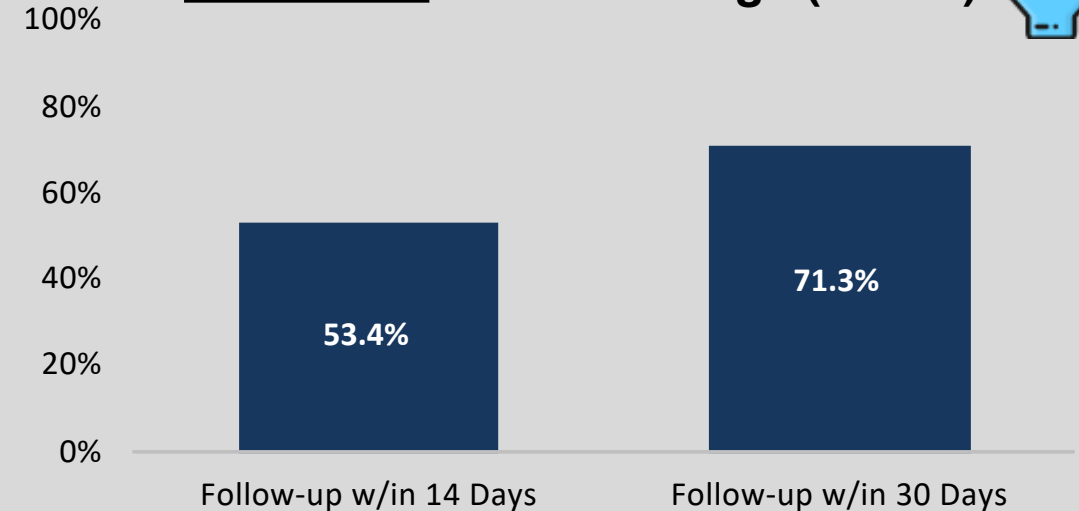

Results from 38 Michigan hospitals participating in a joint CQI during COVID waves 1 & 2

Primary Care Follow-up Visits SCHEDULED after Discharge

Primary Care Follow-up Visits RECEIVED after Discharge (N=638)

Timely outpatient follow-up has been promoted as a key strategy to reduce readmission and promote recovery after acute illness, but scheduling of follow-up prior to discharge and receipt of follow-up after discharge does not occur consistently.
