

MI-COVID19 Data Request Form

Mi-COVID19 Background

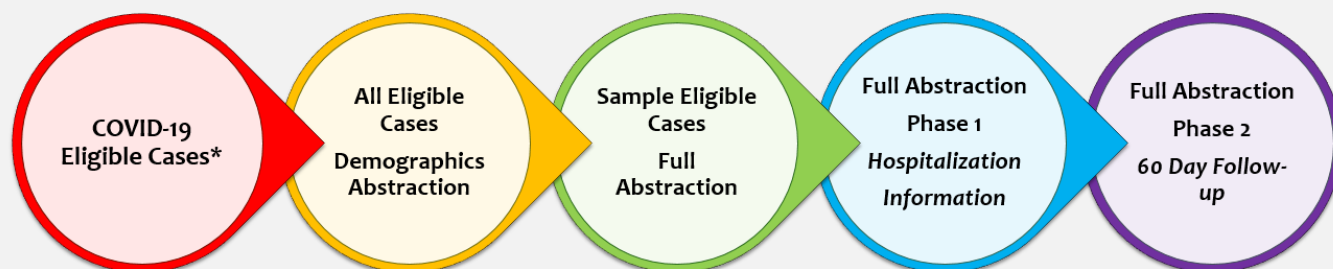

Mi-COVID19 is a clinical registry that is sponsored by Blue Cross Blue Shield of Michigan (BCBSM) as part of the Value Partnerships Program. The Value Partnerships program consists of 17 collaborative quality initiatives, or CQI's. The CQI's consist of hospitals and physicians across the State of Michigan who share a common goal of improving the quality of care for patients through data collection and the creation of registries, identification of best practices and shared learning across hospitals. Mi-COVID19 is a joint venture between several CQI's with the primary goal of obtaining timely data to assist frontline providers caring for patients with COVID-19.

Mi-COVID19 Data Collection Resources

Mi-COVID19 data is currently being voluntarily collected from 25+ hospitals across Michigan. At each hospital demographic data is entered for all patients tested for COVID19 or those with a discharge code for COVID. Depending on the number of cases per hospital, a subset of these receive a detailed abstraction of clinical information including, but not limited to; medical history, testing data, laboratory information, vital signs, treatments/therapies, discharge information and 60 day outcomes.

Please see below for a visual depicting the data collection strategy.

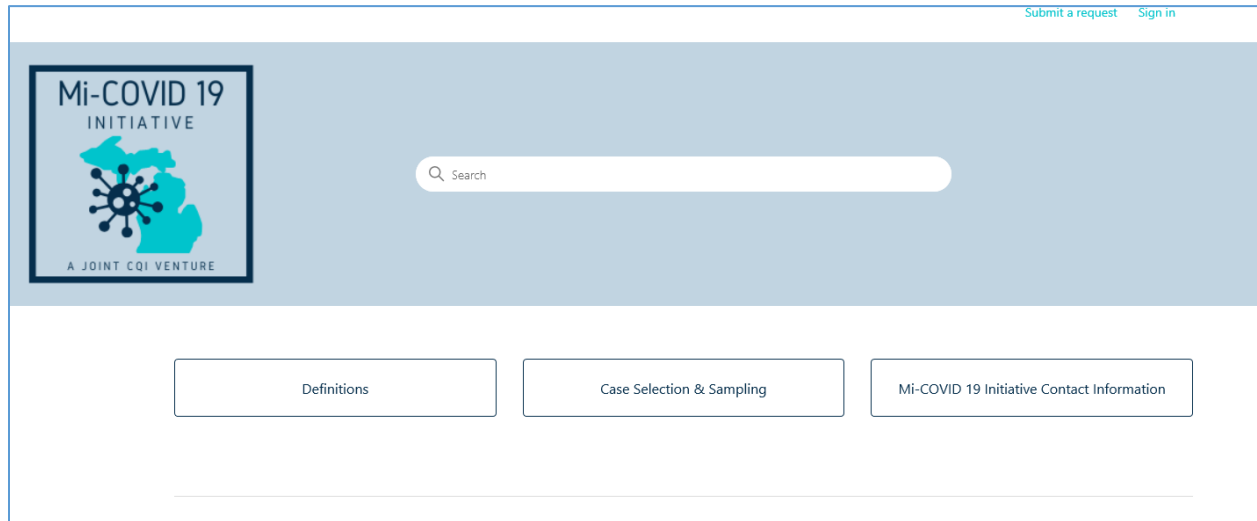

Mi-COVID19 Data Collection Strategy

*See Mi-COVID19 Case Selection & Sampling document for additional details

3. Complete the data request form and select “submit”

Submit a request

If you are a current Mi-COVID 19 data abstractor and need to submit an abstraction question/request, please select "COVID Abstraction Questions/Requests" from the drop down below. If you have a Mi-COVID 19 data request and you are not a current data abstractor, please select "Mi-COVID 19 Data Analysis Requests".

MI-COVID-19 Data Analysis Requests

Your email address

Subject

4. Once your data request has been received, the Mi-COVID19 leadership team will review and triage the data request based on the following factors:

- Alignment with the mission of the collaborative quality initiatives to improve the quality of care for patients with COVID-19
- Statistical resources

Other Important Information

- Mi-COVID19 received a non-regulated designation from the University of Michigan institutional review board as it is consistent with quality improvement
